

Clark Forklift Parts

Clark Forklift Parts - At this time, there are over 350,000 Clark lift trucks performing worldwide, and in excess of 250,000 operating in North America alone. With five major lines across the world, Clark is proud to be one of the most expansive companies in the industry. Heavy duty vehicles ranging from 1,500lb to 18,000lb capacities, dual fuel, petrol, LPG, hand-driven lift trucks, narrow-aisle stackers and electric riders are some of their specialties.

Clark Totalift, covers more than 120,000 particular parts fabricated for 20 unique designs of forklifts and automated equipment. Your regional Clark Seller is your complete source for availability of all your components needs provided by Clark Totalift.

Clark's extraordinary Parts Distribution Facilities are conveniently located in Louisville, Kentucky, which serves both their consumers and dealers in North America, and Changwon, South Korea, which handles their Asian dealers and consumers. For over 90 years, Clark has surpassed industry standards, being one of the most actively advancing manufacturers. Driven to provide the highest level of value and service to our users, Clark remains on the cutting edge when it comes to enhancing output and benefiting performance.

Globally, Clark has one of the most outstanding supplier support networks. With over 550 locations worldwide, dealer representation in over 80 countries and 230 locations in North America, their high level of dedication to their clients predominates the material handling market.

By revolutionizing the operator restraint system protection feature, Clark proudly remains a leader of modernization in the industrial equipment and automated forklift industry. This exceptional dedication to safety is at this time a standard feature on every lift truck.

Clark has a uncompromising mission to possess the No. 1 quality system in the industry which is demonstrated by their commitment to ISO standards. Clark, is the first manufacturer of forklifts and lift trucks to be globally certified with quality standard ISO 9001 in all of its manufacturing plants. Additionally, the ISO 14001 Environmental Conservancy System certificate was awarded to Clark's Korean facility in 2001. This paramount achievement enables Clark to be prepared for any number of environmental limitations, thus placing them in a prevailing industry position.

Clark has chosen the system of "Lean Production" at all of its assembly plants for the reason that this technique is particularly economical and permits minimal use of resources. Developed to ensure maximum efficiency, this system is designed to discover and acknowledge the most effective methods for production facility stewardship. Clark has completed this transition of its Korean plant. COPS which is Clark Optimized Production System, similarly focuses on quality of product and services and manufacturing efficiencies.

By working together, Clark's product suppliers and engineers communicate towards improving product proficiency while minimizing costs. The new value engineering agenda combines progressive product improvement and delivers superior consumer support and service within the industry.
